Document Body

Mr. Sullivan - I reviewed the Draft LUC RD/RA Work Plan for Site 30 and Ross Steenson's comments, which were provided via email on March 26.

The ROD for Site 30 specifies that "ICs would require inspection, maintenance, and reporting of the Site 30 Concrete Pad and Building 502 building slab to ensure remedy compliance" (page 26). The section on LUCs specifies that inspection of the Building 502 slab is required, but does

not mention inspection of the Concrete Slab. If this section is revised, please consider revising the description of ICs to specify the components that apply to the Concrete Pad and the Building 502 slab.

I have no additional comments on the document. Please call/email with any questions. Thank you for the opportunity to review the document.
